### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The present application relates to a single flat panel display for conveying multiple types of flight and aircraft status information and data to aircraft pilots. According to the claimed invention, there is provided presenting a primary data on the display at a first brightness level, presenting a secondary data on the display at a second brightness level predeterminately less than the first brightness level, and detecting that the user is manually entering a new value of the secondary data requiring user attention to the secondary data on the display. According further to the claims invention, there is provided changing the brightness level of the secondary data on the display from the second brightness level to the first brightness level in response to the user manually entering the new value of the secondary data, and returning the changed brightness level of the secondary data from the first brightness level to the second brightness level a predetermined time interval after the user has manually entered the new value of the secondary data. The aforementioned limitations and combination thereof are not taught in the prior art. In light of the foregoing, the claims of the present application are found to be patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
